Resuscitation, 15 (1987) 305–308
Elsevier Scientific Publishers Ireland Ltd.

SUBJECT INDEX
Volume 15 (1987)

Adult respiratory distress syndrome, endotoxemia, granulocyte depletion, hydroxyurea, pigs, 187
Alcohol intoxication, intracranial pressure, respiratory depression, mechanical ventilation, 125
Anoxia, brain cortex, living preparation, calcium binding, subcellular fractions, chlorotetracycline fluorescence, 245
Asymmetric lung disease, lung atelectasis, differential lung ventilation, 77

Bag-valve resuscitator, endotracheal drug administration, nebuliser, beta-2 agonists, intermittent positive pressure ventilation, 135
Beta-2 agonists, endotracheal drug administration, nebuliser, intermittent positive pressure ventilation, bag-valve resuscitator, 135
Blood flow (in CPR), cardiopulmonary resuscitation, computer simulation of CPR, fluid infusion (in CPR), 97
Bradycardia, transcutaneous cardiac pacing, resuscitation, 209
Brain cortex, anoxia, living preparation, calcium binding, subcellular fractions, chlorotetracycline fluorescence, 245
Brain death, persistent vegetative state, neuropathology, 171
Brain injury, pancuronium, hypertension, tachycardia, cerebral ischemia, 227
Brain resuscitations, global ischemia, respiratory and vasomotors centres, functional recovery, rabbit, 267

Calcium binding, anoxia, brain cortex, living preparation, subcellular fractions, chlorotetracycline fluorescence, 245
Calcium overload, cerebral ischemia, lactic acidosis, ischemic cell damage, free radical generation, excitotoxins, 149
Cardiac arrest, cardiopulmonary resuscitation, external cardiac masssage, internal cardiac massage, 13
Cardiopulmonary resuscitation, blood flow (in CPR), computer simulation of CPR, fluid infusion (in CPR), 97
–, cardiac arrest, external cardiac massage, internal cardiac massage, 13
–, fluid loading, regional blood flow, oxygen uptake, 113
–, open-chest massage, closed-chest cardiac output, 9
–, pulmonary barotrauma, intermittent positive pressure ventilation, mechanical ventilators, 201
Cerebral ischemia, lactic acidosis, ischemic cell damage, calcium overload, free radical generation, excitotoxins, 149
–, pancuronium, hypertension, tachycardia, brain injury, 227
Characteristics, high frequency jet ventilation, operational variables, operational guidelines, gas exchange, 87
Chlorotetracycline fluorescence, anoxia, brain cortex, living preparation, calcium binding, subcellular fractions, 245
Closed-chest cardiac output, open-chest massage, CPR,
Computer simulation of CPR, blood flow (in CPR), cardiopulmonary resuscitation, fluid infusion (in CPR), 97
CPR hemodynamics, open-chest cardiac massage, simulation model, 37

Differential lung ventilation, lung atelectasis, asymmetric lung disease, 77

Emergency department, thoracotomy, wound, trauma, 23
Endotoxemia, adult respiratory distress syndrome, granulocyte depletion, hydroxyurea, pigs, 187
Endotracheal drug administration, nebuliser, beta-2 agonists, intermittent positive pressure ventilation, bag-valve resuscitator, 135
Euthyroid sick syndrome, shock, hemorrhage, triiodothyronine (T_3), low-T_3-syndrome, 233

Excitotoxins, cerebral ischemia, lactic acidosis, ischemic cell damage, calcium overload, free radical generation, 149
External cardiac massage, cardiac arrest, cardiopulmonary resuscitation, internal cardiac massage, 13

Fluid infusion (in CPR), blood flow (in CPR), cardiopulmonary resuscitation, computer simulation of CPR, 97
Fluid loading, cardiopulmonary resuscitation, regional blood flow, oxygen uptake, 113
Fluid therapy, shock, 257
Free radical generation, cerebral ischemia, lactic acidosis, ischemic cell damage, calcium overload, excitotoxins, 149
Functional recovery, global ischemia, brain resuscitations, respiratory and vasomotor centres, rabbit, 267

Gas exchange, high frequency jet ventilation, operational variables, characteristics, operational guidelines, 87
Global ischemia, brain resuscitations, respiratory and vasomotor centres, functional recovery, rabbit, 267
Granulocyte depletion, adult respiratory distress syndrome, endotoxemia, hydroxyurea, pigs, 187

Hemorrhage, shock, triiodothyronine (T_3), euthyroid sick syndrome, low-T_3-syndrome, 233
High frequency jet ventilation, operational variables, characteristics, operational guidelines, gas exchange, 87
Hydroxyurea, adult respiratory distress syndrome, endotoxemia, granulocyte depletion, pigs, 187
Hypertension, pancuronium, tachycardia, brain injury, cerebral ischemia, 227

Intermittent positive pressure ventilation, endotracheal drug administration, nebuliser, beta-2 agonists, bag-valve resuscitator, 135
—, pulmonary barotrauma, cardiopulmonary resuscitation, mechaical ventilators, 201
Internal cardiac compression, open-chest cardiac massage, open-chest CPR, 51
Internal cardiac massage, cardiac arrest, cardiopulmonary resuscitation, external cardiac massage, 13
Intracranial pressure, alcohol intoxication, respiratory depression, mechanical ventilation, 125
Ischemic cell damage, cerebral ischemia, lactic acidosis, calcium overload, free radical generation, excitotoxins, 149

Lactic acidosis, cerebral ischemia, ischemic cell damage, calcium overload, free radical generation, excitotoxins, 149
Living preparation, anoxia, brain cortex, calcium binding, subcellular fractions, chlorotetracycline fluorescence, 245
Low-T_3-syndrome, shock, hemorrhage, triiodothyronine (T_3), euthyroid sick syndrome, 233
Lung atelectasis, asymmetric lung disease, differential lung ventilation, 77

Mechanical ventilation, intracranial pressure, alcohol intoxication, respiratory depression, 125
Mechanical ventilators, pulmonary barotrauma, intermittent positive pressure ventilation, cardiopulmonary resuscitation, 201

Nebuliser, endotracheal drug administration, beta-2 agonists, intermittent positive pressure ventilation, bag-valve resuscitator, 135
Neuropathology, persistent vegetative state, brain death, 171

Open-chest cardiac massage, CPR hemodynamics, simulation model, 37
—, internal cardiac compression, open-chest CPR, 51
Open-chest CPR, open-chest cardiac massage, internal cardiac compression, 51
Open-chest massage, CPR, closed-chest cardiac output, 9
Operational guidelines, high frequency jet ventilation, operational variables, characteristics, gas exchange, 87
Operational variables, high frequency jet ventilation, characteristics, operational guidelines, gas exchange, 87
Oxygen uptake, cardiopulmonary resuscitation, fluid loading, regional blood flow, 113

Pancuronium, hypertension, tachycardia, brain injury, cerebral ischemia, 227
Persistent vegetative state, neuropathology, brain death, 171

Pigs, adult respiratory distress syndrome, endotoxemia, granulocyte depletion, hydroxyurea, 187
Pulmonary barotrauma, intermittent positive pressure ventilation, cardiopulmonary resuscitation, mechanical ventilators, 201

Rabbit, global ischemia, brain resuscitations, respiratory and vasomotors centres, functional recovery, 267
Regional blood flow, cardiopulmonary resuscitation, fluid loading, oxygen uptake, 113
Respiratory and vasomotors centres, global ischemia, brain resuscitations, functional recovery, rabbit, 267
Respiratory depression, intracranial pressure, alcohol intoxication, mechanical ventilation, 125
Resuscitation, bradycardia, transcutaneous cardiac pacing, 209

Shock, fluid therapy, 257
—, hemorrhage, triiodothyronine (T_3), euthyroid sick syndrome, low-T_3-syndrome, 233
Simulation model, open-chest cardiac massage, CPR hemodynamics, 37
Subcellular fractions, anoxia, brain cortex, living preparation, calcium binding, chlorotetracycline fluorescence, 245

Tachycardia, pancuronium, hypertension, brain injury, cerebral ischemia, 227
Thoracotomy, emergency department, wound, trauma, 23
Transcutaneous cardiac pacing, bradycardia, resuscitation, 209
Triiodothyronine (T_3), shock, hemorrhage, euthyroid sick syndrome, low-T_3-syndrome, 233
Trauma, thoracotomy, emergency department, wound, 23

Wound, thoracotomy, emergency department, trauma, 23

Resuscitation, 15 (1987) 309
